Notes from NJLBHA Meeting on May 15, 2021

- The Executive Committee introduced themselves to start the meeting. There were only about 15 participants. The online link for this meeting is below.
- The video from the meeting has not been posted yet on the NJLBHA website.
- Michael Redmond spoke about the Sustainable New Jersey program. The upcoming Summit event is planned for May 17 to May 21. He suggested that we all become educated about this program especially as it may empower the local BOHs. Our Orientation Manual will be updated to include information about this program.
- The S1/A3389 bill is stalled in the Assembly. Michael Redmond plans to reach out to Senator Vitale and the other senators in the Health Committee. A letter will be drafted and reviewed by the Executive Committee as they have concerns about this bill. Although it passed in the Senate, our view is that the process was flawed as the Health Committee did not review the bill. There is some optimism that Senator Vitale and his Health Committee will be receptive to our suggestions.
- A Health Institute survey sent to the citizens of New Jersey about public health topics has been helpful but will be discontinued due to federal funds running out and no state funding appears to be coming. The survey enables people to describe their experiences and offer suggestions.
- John Saccenti discussed reopening the schools. Executive Order 175 requires the local BOEs to work with the local BOHs; however, as we have discussed before, this is not always occurring. In his town of South Brunswick, a long struggle has finally been successful. There is cooperation now. The BOE even includes BOH announcements in their public notices. Per John, the BOH "played hardball" to achieve this success.
- Nancy Wilson provided the COVID-19 Update. She discussed the inconsistencies between the CDC and Governor Murphy's protocols. A major concern is that the CDS changed a top level policy on wearing masks without changing lower level policies. Thus, there are inconsistencies within the CDC guidelines and many related organizations, such as ASHRAE, will have to update their own sets of guidelines to be consistent with the CDC.
- Nancy Wilson discussed other related topics including whether vaccination cards will need to be
 presented in some places. In addition, water systems in the schools should be tested regularly
 even if the schools are closed. This testing should be performed by independent experts only. The
 water systems should be fully flushed prior to reopening the buildings. Hopefully, the water
 systems in our schools are in compliance with these standards.
